GREYWATER REUSE SOLUTIONS FOR NEW HOMES ON SLABS

Option A FLOW

From \$1500 Fully installed*

*Includes a G-Flow & a complete Drip-Tube Kit, does not include cost of Stage 1 (by home builder)

Stage 1: Getting the house G-Flow ready (by home builder @pre-lay stage)

1. Dedicated outdoor powerpoint outside the laundry
2. 50mm PVC sleeve from the washing machine position to outside the laundry
3. Disconnected Gully (DG) outside the laundry

Ideal for homes with:

- Small gardens (less than 40sqm)
- Low occupancy rate (one or two people)
- One or two bedrooms only
- Partial water reuse options (laundry or upper floor shower only)

G-Flow complete Plug & Play (GFGF)

Complete Drip-Tube Kit (GFDL-CK)

Stage 2: Installing the G-Flow system & the irrigation components (prior to starting the paving work)

1. Installing the G-Flow diverter system
2. Connecting the inlet & overflow pipes
3. Installing the G-Flow irrigation system

Features & Advantages:

- Economical & compact unit
- Easy to install
- Large graded filters with sludge trap
- Auto de-sludge configuration
- Simple & robust design
- Low maintenance (6 months filter clean)
- 3 way manual diversion valve
- 50mm Inlet & outlet
- Wall mounting brackets (included)
